Each item below is a belief statement about your medical condition with which you may agree or disagree. Each statement is a scale which ranges from strongly disagree (0) to strongly agree (3). For each item we would like you to write the number that represents the extent to which you agree or disagree with that statement. The more you agree with a statement, the higher will be the number you write. This is a measure of your personal beliefs; obviously, there are no right or wrong answers.
