

## **STRONG HEART STUDY PAPER PROPOSAL GUIDELINES**

We encourage investigators to submit paper proposals that utilize Strong Heart Study data to address research questions related to cardiovascular health outcomes.

Investigators submit a paper proposal that is then reviewed by Dr. Ying Zhang, Chairperson of the Publication and Presentation Committee in the Strong Heart Study Coordinating Center. Dr. Zhang reviews all proposals and consults with investigators regarding the availability of data that are needed for each proposed project. Projects that are found to be feasible in terms of availability of data are then forwarded to the Publication and Presentation Committee for their review. The committee makes a recommendation to approve the proposal, deny the proposal, or to defer a decision pending additional information or clarification from the investigators. After receiving approval from the Publication and Presentation Committee, the project may commence. After the paper is drafted, the draft must be submitted to the IHS IRB and tribal health boards from each community for approval. Papers may be submitted for publication review only after the drafts have been reviewed and approved by the tribal health agencies and IHS IRBs.

The following are additional requirements:

- The title of the paper must include the phrase “Strong Heart Study” or “Strong Heart”
- **If you have SHS data from previous work, please delete data collected from one participating community. This community withdrew consent. Their data may not be included in any analyses. An exclusion list will be provided upon request for an approved paper proposal.**
- If no SHS PI is a co-author and if the analyses are not performed by the Strong Heart Study Coordinating Center, the authors must agree to submit the penultimate (next to final) draft to the Coordinating Center for statistical review.
- Authors must comply and respond regularly to the status survey on their approved paper proposals conducted by the SHS Publication and Presentation Committee twice a year.
- Papers lacking a PI as a co-author. Publication and Presentation Committee will advise the primary author whether a near final draft will need to be sent to the Publication and Presentation committee for review by at least two reviewers (selected by the Chairperson). This review is the first step that must be completed prior to review of the penultimate draft by NHLBI/Tribes/IHS.
- A **Lay Summary** is required **when submitting the completed draft** for IHS IRB and tribal approvals. If one or more co-authors are IHS employees, **the manuscripts must contain the following disclaimer (verbatim):** “The opinions expressed in this paper are those of the author(s) and do not necessarily reflect the views of the Indian Health Service.”

- Papers must acknowledge support from Strong Heart Study grants including the Coordinating Center grant using the statement “Research reported in this publication was supported by the National Heart, Lung, And Blood Institute of the National Institutes of Health under Award Number R01HL109284. The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health.” and must be submitted as per the NIH Manuscript Submission (NIHMS) system requirements.
- Suggested acknowledgement of the grant support for the Strong Heart Study:

*This study was supported by cooperative agreement grants U01-HL41642, U01-HL41652, U01-HL41654, U01-HL65520, and U01-HL65521 and research grants R01-HL109315, R01HL109301, R01HL109284, R01HL109282 and R01HL109319 from the National Heart, Lung, and Blood Institute, Bethesda, MD.*

- Do not mention any tribal/community name in a manuscript, including the acknowledgement section.
