MEDICATION RECEPTION

As you know, the Strong Heart Study will be describing all medications its participants are using, both prescription and over-the-counter, and traditional remedies. These include pills, liquid medications, skin patches, eye drops, creams, salves, inhalers and injections, as well as cold or allergy medications, vitamins, herbal, homeopathic or traditional medicines and other supplements. Prior to your clinic visit we asked that you bring all your medications into the clinic in their original bottles.

1. Have you brought your medications with you? Are these all the medications that you have taken in the past two weeks?
   - Yes [ ] (May I see them?)
   - No [ ] (Make arrangements to obtain)
   - Took no meds [ ]
   - Refused [ ] (Cite reasons for refusal in the space below)
   - Reasons for refusal: ____________________________

Interviewer, please observe:

2. Are there any prescription medications? Yes [ ] No [ ]
3. Are there any over the counter (OTC) medications? Yes [ ] No [ ]
**MEDICATIONS (Prescription & Non-Prescription)**

Copy the name of medicine, the strength (include units), and the total number of doses for prescription and non-prescription. Include all pills, skin patches, creams, salves, inhalers, nebulizers, injections, vitamins and supplements, cold and allergy medication, and any over-the-counter medications.

Each item below is a belief statement about your medical condition with which you may agree or disagree. Each statement is a scale which ranges from strongly disagree (0) to strongly agree (3). For each item we would like you to circle the number that represents the extent to which you agree or disagree with that statement. The more you agree with a statement, the higher will be the number you write. This is a measure of your personal beliefs; obviously, there are no right or wrong answers.

Posttraumatic Stress Disorder (PTSD)
Many people experience very frightening events sometime during their lives. Sometimes these experiences can upset them so much that their health suffers. The following six questions ask whether you have experienced such an event, and, if so, whether it has led to lasting problems. If you prefer not to answer a question, you can skip it.

1. Have you ever had an extremely frightening, traumatic or horrible experience like being a victim of a violent crime, seriously injured in an accident, being assaulted, seeing someone seriously injured or killed, or being a victim of a natural disaster?
   Yes |___|1  No |___|2
   (If you answered “NO,” go to question 7)

During the past month:
2. Did you relive the traumatic experience through recurrent dreams, preoccupation or flashbacks?
   Yes |___|1  No |___|2

3. Did you seem less interested than usual in important things, feel “out of it,” or did you have a hard time with your feelings or emotions?
   Yes |___|1  No |___|2

4. Did you have problems sleeping, concentrating, or having a short temper?
   Yes |___|1  No |___|2

5. Did you avoid any place or anything that reminded you of the original horrible event?
   Yes |___|1  No |___|2

6. Did you have some of the above problems for more than one month?
   Yes |___|1  No |___|2

## 14-Item Resilience Scale (RS-14)

Resilience may be defined as the ability to regulate emotions, maintain positive attitude, or see failure as helpful feedback despite conditions of extreme stress. The RS-14 measures traits of individual resilience, including self-reliance, perseverance, self-regard, engagement, humor, resourcefulness, meaningfulness, and composure.

**Multidimensional and Interpersonal Resilience Measure (MIRM)**

There are many aspects of resilience. Some scientists believe that resilience is also a feature of community, both defined by and improved by social support. The MIRM scale covers more complex concepts of resilience, including access to a support network, optimism, access to economic and social resources, spirituality and religiosity, relational accord, emotional regulation, emotional expression, and communication.

Revised Multigroup Ethnic Identity Scale (MEIM-R)

Identity is complex, and has been associated with resilience, social support, and health. Cultural, social, and ethnic identities may not be restricted to a single group, but can be fluid, variable, overlapping, or mixed. The MEIM-R includes self-categorization on ethnic identity as well as exploration and commitment to that identity.

**Instructions:** Please fill in the blank. If you are unsure, please give the best answer you can.

1. I consider myself as belonging to ______________________________ race/ethnic group.

**Orthogonal Cultural Identity Scale (OCIS)**

The degree of alignment and participation in one’s own culture can have potential consequences for resilience and positive healthy aging. In youth, enculturation and social support account for 34% of resilience. The OCIS measures annual family activities, personal and family involvement in traditional culture, and personal and family success in traditional culture.

Social Support and Social Undermining Items (SS/U)

Social support and its reverse—social undermining—are known to be significant factors in health and resilience. Just as with resilience, social support and undermining are complex and may be defined multiple ways. The SS/U scale evaluates emotional (perceived) and instrumental (received) support; critical appraisal; and isolation.

Social Network Index (SNI)

Another feature of social support is the size and complexity of a social network. This is important because social effects for people with a large, surface network (lots of casual acquaintances) may be different than those who have a small, deep network (few close friends). The SNI assesses 12 types of social relationships.

Functional Activities Questionnaire (FAQ)

Dementia is a clinical syndrome wherein the patient is unable to perform the usual activities of their daily lives, such as preparing balanced meals or managing personal finances. Dementia can be caused by cardiovascular, cerebrovascular, neurodegenerative, or other disease. The Functional Activities Questionnaire (FAQ) measures the ability to perform these instrumental activities of daily living (IADLs).

**Instructions:** Please rate your ability to complete the following daily tasks, according to the following scale, by circling the best answer. If you **never did** the task or activity, rate **how well you think you would do, if you were to do it now.** For each task or activity, also indicate whether your ability has changed **over the past year.** Mark only one answer for each question. To change an answer, fully black out the incorrect mark and then circle the correct number. If you are unsure, please give the best answer you can.

4. In the last 12 months, did your household ever cut the size of your meals or skip meals because there wasn’t enough money for food?
   i. □ Yes
   ii. □ No
   iii. □ I choose not to answer
   iv. IF YES How often did this happen—almost every month, some months but not every month, or in only 1 or 2 months?
      a. □ Almost every month
      b. □ Some months but not every month
      c. □ Only 1 or 2 months
      d. □ I choose not to answer

5. In the last 12 months, did you ever eat less than you felt you should because there wasn’t enough money for food?
   a. □ Yes
      □ No
      □ I choose not to answer
6. In the last 12 months, were you ever hungry but didn't eat because there wasn't enough money for food?
    □ Yes

**DOPPLER BLOOD PRESSURE**

Doppler blood pressure is measured in the posterior tibial artery. If not audible, use dorsalis pedis. Use left arm if left arm was used for standard blood pressure reading.

- 0 = neither posterior tibial artery nor dorsalis pedis artery was audible.
- 888 = participant refuses or if blood pressure is not taken for a medical reason or amputation.
- 999 = unable to obliterate (over 250 mmHg).

The Bristol Stool Chart - A Tool to Track Your Bowel Movement

What is the Bristol Stool Chart
The bowel is a part of the digestive system that allows people to absorb nutrients from food and expel the waste that the body cannot use. If feces pass too quickly or too slowly, it may indicate a problem with the bowels. The Bristol Stool Chart is a quick, inexpensive, and reliable way to assess how long a stool has spent in the bowels. The tool breaks down stools into seven types based on their appearance, ranging from type 1 (hard) to type 7 (loose). The scale was created in 1997 by a team of healthcare providers at the British Royal Infirmary in Bristol, England. Doctors can use the tool as a practical guide to identify problems with bowel movements and know if your bowel movement is healthy. Researchers have also used the chart to identify problematic foods, supplements, digestive health and other lifestyle stressors, and assess how well various treatments work for people with certain GI problems.

Why Stool Type Matters
Why does your type of stool matter? It can help you to identify what is normal and if you are experiencing constipation or diarrhea. It can also help you to describe to your doctor what you are experiencing when you are using the restroom.

Types of Stool and What They Mean
The Bristol Stool Chart classifies stools into seven groups. Types 1-2 indicate constipation. Types 3-5 are considered normal, and types 6-7 indicate diarrhea.

Regular Bowel Movements
So, what is normal? When it comes to your bowel movements everyone seems to have their own normal. We are all unique. But, in general your bowel movements should pass easily and be well formed. You should be using the restroom on a regular basis, and using the restroom should not be a struggle.

When to Speak with a Doctor
If a person is persistently passing stools at either end of the Chart or switching from one end of the scale to the other, it is advisable that they consult with a doctor. A healthcare professional can help identify the potential cause of the abnormal bowel movements and recommend suitable treatments to allow an individual to pass regular and healthy stools.

Maintaining Good Bowel Health
Maintaining good bowel health typically includes three steps:
- Eating plenty of fiber. Fiber provides bulk to help stool pass
- Drinking enough fluid. Fluids help keep things lubricated and moving
- Being physically active. Physical activity helps to keep the body and bowels healthy.
